FROM THE FRONT COVER

Biodegradable Lubricants formulated with vegetable oils

Tom's Secret Formula Earth Friendly line of lubricants includes B-404 all-purpose lubricant and a garage door lubricant. Both are formulated with USA-grown vegetable oils and selective additives. B-404 contains no chlorine, sulfur or regulated toxins and is safe for all metals. It does not evaporate,

providing long-lasting lubrication. The garage door lubricant protects and quiets door parts, as well as loosens frozen bolts and nuts and prevents rust.
